Relevant Experience

Clarus Glassboards – System Administrator | Fort Worth, Texas

18.5%

Budget Reduction

\$45K

Cost Savings

200+

Employees Served

Responsibilities: Responsible for all aspects of IT for 200+ employees including management of on-prem/cloud servers & networking, budgeting, creating policy, negotiating contracts, and all desktop support needs.

Products and Technologies: Okta, CrowdStrike Falcon Complete, Knowbe4 Defend (Egress), Azure, Egnyte, NinjaOne, Virtual Keypad, Home Assistant, n8n, Ubiquiti.

Notable Projects:

- Vendor Review:** Reduced waste by \$45K, approximately 18.5% of IT budget.
- Built Automation Server:** Built automation infrastructure for Tableau developer using Proxmox as hypervisor with PCI passthrough, Ubuntu VM running n8n Docker container and Ollama.
- CrowdStrike SIEM:** Setup log ingestion system to aggregate logs from NinjaOne, Okta, Entra, and Ubiquiti into CrowdStrike SIEM.
- Improved Security Maturity:**
 - Email security - Knowbe4 Defend Ingress phishing/spam detection
 - Endpoint - Switched from Darktrace EDR to CrowdStrike Complete MDR, saving money while gaining managed solution.
 - Network security - Content filtering, safe DNS, zone-based firewall for network segmentation, IDS/IPS.
- Server Refresh:**
 - Operating System - Windows Server 2012 to 2025.
 - Hardware - Dell R630 6-core 1.8GHz to 8-core 3.2GHz, added SSDs via NVME HBA, and upgraded TPM 1.3 to 2.0.
 - Maintenance - CMOS and RAID battery replacement.

Beyondthebit MSP – Site Lead | Dallas, Texas

6

Clients Managed

1,000+

Employees Served

Responsibilities: Responsible for 6 clients with 1,000+ total combined employees. Handled tasks associated with various roles including System Administration, Network Administration, and Desktop Support

Products and Technologies: Kaseya (AutoTask, Datto, ITglue), Microsoft (Client, server, cloud, on-prem), Ubiquiti & Cisco.

Notable Projects:

- Datto Autotask Automations:** Built Datto components such as add user to network operators group for Wireguard limited UI.
- Test Lab:** Setup isolated UDM Pro, Windows Server, and Synology to test clients configurations before deployment.
